TOXICOLOGY

SUBJECT INDEX

Volume 72 (1992)

acetylcholinesterase inhibitors, oximes, 99
aconitase, monochloroacetic acid, F344 rats, B6C3F1 mice, cardiomyopathy, 77
active oxygen species, renal glomerular epithelial cell line (SGE1), puromycin aminonucleoside, 329
adriamycin, doxorubicin, ryanodine receptor, sarcoplasmic reticulum, cardiomyopathy, 189
adult cardiac cell cultures, cocaine, cardiotoxicity, lactate dehydrogenase, contractile activity, morphology, 175
alachlor, herbicide, metabolism, DNA damage, alkaline elution, 207
alkaline elution, alachlor, herbicide, metabolism, DNA damage, 207
allopurinol, in vitro, metabolic biotransforming system, post-implantation embryos, aspirin, 239
ascorbic acid, tobacco smoke, mainstream, sidestream, tissue, glutathione, 131
aspirin, in vitro, metabolic biotransforming system, post-implantation embryos, allopurinol, 239
avarol, avarone, lipid peroxidation, 221
avarone, avarol, lipid peroxidation, 221

B6C3F1 mice, monochloroacetic acid, F344 rats, aconitase, cardiomyopathy, 77
bacteria glutathione, cisplatinum toxicity, 341
benzene, mathematical model, toxicity analysis, hematopoiesis, 265

cadmium, human trophoblast cell, metallothionein (MT), zinc, 167
cadmium, liver slices, metallothionein, glutathione, 281
cadmium, metallothionein, lipid peroxidation, rat, 251
canine renal ultrastructure, carboxyatractyloside, stevioside, nephrotoxicity, proximal tubular toxins, dogs, 299
carboxyatractyloside, stevioside, nephrotoxicity, proximal tubular toxins, canine renal ultrastructure, dogs, 299
cardiomyopathy, adriamycin, doxorubicin, ryanodine receptor, sarcoplasmic reticulum, 189
cardiomyopathy, monochloroacetic acid, F344 rats, B6C3F1 mice, aconitase, 77
cardiotoxicity, cocaine, adult cardiac cell cultures, lactate dehydrogenase, contractile activity, morphology, 175
cisplatinum toxicity, glutathione, bacteria 341
cocaine, cardiotoxicity, adult cardiac cell cultures, lactate dehydrogenase, contractile activity, morphology, 175
contractile activity, cocaine, cardiotoxicity, adult cardiac cell cultures, lactate dehydrogenase, morphology, 175
copper, *meso*-2,3-dimercaptosuccinic acid (DMSA), pregnant mice, oral administration, subcutaneous administration, zinc, 27
cytochrome *P*-450, 3-trifluoromethylpyridine, *N*-oxide olfactory liver metabolism 61
cytochrome *P*-450, dimethylformamide, liver, glutathione, glutathione *S*-transferase, 41

dietary protein, methylmercury, glutathione, 17
diisopropyl fluorophosphate, neurotoxicity, organophosphates, hen, tabun, paraoxon, isofenphos, 117
dimethylformamide, liver, cytochrome *P*-450, glutathione, glutathione *S*-transferase, 41
dimethylnitrosamine, immunosuppression, hepatocyte culture conditions, hepatocyte-splenocyte co-culture, 315
DNA damage, alachlor, herbicide, metabolism, alkaline elution, 207
dogs, carboxyatractyloside, stevioside, nephrotoxicity, proximal tubular toxins, canine renal ultrastructure, 299
doxorubicin, adriamycin, ryanodine receptor, sarcoplasmic reticulum, cardiomyopathy, 189

F344 rats, monochloroacetic acid, B6C3F1 mice, aconitase, cardiomyopathy, 77
free radical production, paraquat, liver mitochondria mitochondrial injury by paraquat, 1

free radicals, vesicants, monofunctional sulfur mustard, oxidative stress, lipid peroxidation, lung injury, 153

glutathione *S*-transferase, dimethylformamide, liver, cytochrome *P*-450, glutathione, 41
glutathione, cadmium, liver slices, metallothionein, 281
glutathione, cisplatinum toxicity, bacteria 341
glutathione, dimethylformamide, liver, cytochrome *P*-450, glutathione *S*-transferase, 41
glutathione, methylmercury, dietary protein, 17
glutathione, tobacco smoke, mainstream, sidestream, tissue, ascorbic acid, 131
gonadotropin-releasing hormone, lead toxicity, hypothalamus, somatostatin, progesterone, guinea pig, 89
guinea pig, lead toxicity, hypothalamus, somatostatin, gonadotropin-releasing hormone, progesterone, 89

hematopoiesis, benzene, mathematical model, toxicity analysis, 265
hen, neurotoxicity, organophosphates, tabun, paraoxon, diisopropyl fluorophosphate, isofenphos, 117
hepatocyte culture conditions, dimethylnitrosamine, immunosuppression, hepatocyte-splenocyte co-culture, 315
hepatocyte-splenocyte co-culture, dimethylnitrosamine, immunosuppression, hepatocyte culture conditions, 315
herbicide, alachlor, metabolism, DNA damage, alkaline elution, 207
human trophoblast cell, metallothionein (MT), zinc, cadmium, 167
hypothalamus, lead toxicity, somatostatin, gonadotropin-releasing hormone, progesterone, guinea pig, 89

immunosuppression, dimethylnitrosamine, hepatocyte culture conditions, hepatocyte-splenocyte co-culture, 315
in vitro, metabolic biotransforming system, post-implantation embryos, allopurinol, aspirin, 239
isofenphos, neurotoxicity, organophosphates, hen, tabun, paraoxon, diisopropyl fluorophosphate, 117

lactate dehydrogenase, cocaine, cardiotoxicity, adult cardiac cell cultures, contractile activity, morphology, 175
lead toxicity, hypothalamus, somatostatin, gonadotropin-releasing hormone, progesterone, guinea pig, 89
lipid peroxidation, avarol, avarone, 221
lipid peroxidation, cadmium, metallothionein, rat, 251
lipid peroxidation, quinolones, phototoxicity, photohemolysis, potassium efflux, 145
lipid peroxidation, vesicants, monofunctional sulfur mustard, oxidative stress, free radicals, lung injury, 153
liver mitochondria paraquat, mitochondrial injury by paraquat, free radical production, 1
liver slices, cadmium, metallothionein, glutathione, 281
liver 3-trifluoromethylpyridine, *N*-oxide olfactory cytochrome *P*-450, metabolism 61
liver, dimethylformamide, cytochrome *P*-450, glutathione, glutathione *S*-transferase, 41
lung injury, vesicants, monofunctional sulfur mustard, oxidative stress, free radicals, lipid peroxidation, 153

mainstream, tobacco smoke, sidestream, tissue, glutathione, ascorbic acid, 131
mathematical model, benzene, toxicity analysis, hematopoiesis, 265
meso-2,3-dimercaptosuccinic acid (DMSA), copper, pregnant mice, oral administration, subcutaneous administration, zinc, 27
metabolic biotransforming system, in vitro, post-implantation embryos, allopurinol, aspirin, 239
metabolism 3-trifluoromethylpyridine, *N*-oxide olfactory liver cytochrome *P*-450, 61
metabolism, alachlor, herbicide, DNA damage, alkaline elution, 207
metallothionein (MT), human trophoblast cell, zinc, cadmium, 167
metallothionein, cadmium, lipid peroxidation, rat, 251
metallothionein, cadmium, liver slices, glutathione, 281
methylmercury, glutathione, dietary protein, 17
mitochondrial injury by paraquat, paraquat, liver mitochondria free radical production, 1
monochloroacetic acid, F344 rats, B6C3F1 mice, aconitase, cardiomyopathy, 77
monofunctional sulfur mustard, vesicants, oxidative stress, free radicals, lipid peroxidation, lung injury, 153
morphology, cocaine, cardiotoxicity, adult cardiac cell cultures, lactate dehydrogenase, contractile activity, 175

N-oxide 3-trifluoromethylpyridine, olfactory liver cytochrome *P*-450, metabolism 61
nephrotoxicity, carboxyatractyloside, stevioside, proximal tubular toxins, canine renal ultrastructure, dogs, 299
neurotoxicity, organophosphates, hen, tabun, paraoxon, diisopropyl fluorophosphate, isofenphos, 117

olfactory 3-trifluoromethylpyridine, *N*-oxide liver cytochrome *P*-450, metabolism 61
oral administration, copper, *meso*-2,3-dimercaptosuccinic acid (DMSA), pregnant mice, subcutaneous administration, zinc, 27
organophosphates, neurotoxicity, hen, tabun, paraoxon, diisopropyl fluorophosphate, isofenphos, 117
oxidative stress, vesicants, monofunctional sulfur mustard, free radicals, lipid peroxidation, lung injury, 153
oximes, acetylcholinesterase inhibitors, 99

paraoxon, neurotoxicity, organophosphates, hen, tabun, diisopropyl fluorophosphate, isofenphos, 117
paraquat, liver mitochondria mitochondrial injury by paraquat, free radical production, 1
pesticide synergist, piperonyl butoxide, toxicity, subacute, rats, 291
phosphoinositide hydrolysis, trichothecene mycotoxins, platelets, 51
photohemolysis, quinolones, phototoxicity, lipid peroxidation, potassium efflux, 145
phototoxicity, quinolones, photohemolysis, lipid peroxidation, potassium efflux, 145
piperonyl butoxide, pesticide synergist, toxicity, subacute, rats, 291
platelets, trichothecene mycotoxins, phosphoinositide hydrolysis, 51
post-implantation embryos, in vitro, metabolic biotransforming system, allopurinol, aspirin, 239
potassium efflux, quinolones, phototoxicity, photohemolysis, lipid peroxidation, 145
pregnant mice, copper, *meso*-2,3-dimercaptosuccinic acid (DMSA), oral administration, subcutaneous administration, zinc, 27
progesterone, lead toxicity, hypothalamus, somatostatin, gonadotropin-releasing hormone, guinea pig, 89
proximal tubular toxins, carboxyatractyloside, stevioside, nephrotoxicity, canine renal ultrastructure, dogs, 299
puromycin aminonucleoside, active oxygen species, renal glomerular epithelial cell line (SGE1), 329

quinolones, phototoxicity, photohemolysis, lipid peroxidation, potassium efflux, 145

rat, cadmium, metallothionein, lipid peroxidation, 251
rats, piperonyl butoxide, pesticide synergist, toxicity, subacute, 291
renal glomerular epithelial cell line (SGE1), active oxygen species, puromycin aminonucleoside, 329
ryanodine receptor, adriamycin, doxorubicin, sarcoplasmic reticulum, cardiomyopathy, 189

sarcoplasmic reticulum, adriamycin, doxorubicin, ryanodine receptor, cardiomyopathy, 189
sidestream, tobacco smoke, mainstream, tissue, glutathione, ascorbic acid, 131
somatostatin, lead toxicity, hypothalamus, gonadotropin-releasing hormone, progesterone, guinea pig, 89
stevioside, carboxyatractyloside, nephrotoxicity, proximal tubular toxins, canine renal ultrastructure, dogs, 299
subacute, piperonyl butoxide, pesticide synergist, toxicity, rats, 291
subcutaneous administration, copper, *meso*-2,3-dimercaptosuccinic acid (DMSA), pregnant mice, oral administration, zinc, 27

tabun, neurotoxicity, organophosphates, hen, paraoxon, diisopropyl fluorophosphate, isofenphos, 117
tissue, tobacco smoke, mainstream, sidestream, glutathione, ascorbic acid, 131
tobacco smoke, mainstream, sidestream, tissue, glutathione, ascorbic acid, 131
toxicity analysis, benzene, mathematical model, hematopoiesis, 265
toxicity, piperonyl butoxide, pesticide synergist, subacute, rats, 291
trichothecene mycotoxins, platelets, phosphoinositide hydrolysis, 51
3-trifluoromethylpyridine, *N*-oxide olfactory liver cytochrome *P*-450, metabolism 61

vesicants, monofunctional sulfur mustard, oxidative stress, free radicals, lipid peroxidation, lung injury, 153

zinc, copper, *meso*-2,3-dimercaptosuccinic acid (DMSA), pregnant mice, oral administration, subcutaneous administration, 27
zinc, human trophoblast cell, metallothionein (MT), cadmium, 167
